BAB I

PENDAHULUAN

A. Dasar Teori

WordPress adalah Content Management System (CMS) open source yang paling populer di dunia. WordPress memungkinkan siapa saja untuk membuat dan mengelola website tanpa harus menulis kode secara manual. WordPress pertama kali dirilis pada tahun 2003 oleh Matt Mullenweg dan Mike Little.

B. Tujuan

1. Mahasiswa memahami konsep dasar Content Management System (CMS) WordPress.
2. Mahasiswa dapat melakukan instalasi WordPress pada localhost.
3. Mahasiswa mampu mengelola konten berupa Page, Post, Media, dan Menu.
4. Mahasiswa mengenal manajemen tema.
5. Mahasiswa dapat melakukan deployment WordPress ke hosting.

About Me

I am a Software Engineering student with a background in Computer & Network Technology. I specialize in web development, with hands-on experience in creating WordPress-based websites and building custom portfolios using HTML, CSS, and JavaScript. My previous projects have ranged from developing educational websites to creating company profiles for community organizations. Currently, I am also exploring blockchain technology and the evolution of Web 3.0, with the goal of understanding decentralized technologies and implementing them in future web development projects. I am eager to continuously enhance my technical skills, particularly in full-stack web development and blockchain, and contribute to the creation of innovative and user-centric digital solutions. I also have a strong interest in staying up-to-date with the latest web technologies and trends to deliver high-quality projects that meet the needs of users and businesses.

BAB III

PENUTUP

A. Kesimpulan

Menurut saya membuat website dengan wordpress itu asik, yang ribet hanya dimasalah hosting saja, cukup tricky.

Tapi overall worth it buat bikin profile page dari wordpress
